VCL System

Secureye

The Virtual Central Locking System with multi-functions. It integrated GSM Module inside, and almost all useful functions and features of the alarm systems in the worldwide markets. Also it with innovative and experienced functions and features to meet the required and potential demands.

The Virtual Central Locking System is a new security protection solution. It is special for home, house and office and other applications. It based on wireless GSM communication network, it can alert you by SMS and calling.

The Virtual Central Locking System with user friendly design idea, all operations and settings are visual and intuitive! What you need is a SIM card which supports call ID function.

Specification

Model	S-A200
Rated Voltage	9-12VDC
Standby Current	30-40mA
Siren Output Voltage	12VDC
Working Temperature	-10°C ~ +60°C
Storage Temperature	-20°C ~ +60°C
Relative Humidity	10-90%, No condensation
Work Frequency	900/1800/1900MHz
Communication Protocol	GSM Phase 2/2+ (include data service)
Wireless Sensor Receiving Frequency	433.92 MHZ
Wireless Sensor Permission Quantity	16Pcs
Remote Control Permission Quantity	5Pcs
Effective Distance Wireless Of Remote Control	100 m
Battery	1000mAh@3.7V

Features

- ★ 16 Wireless Zone
- ★ 2 Output Relay
- ★ 5 Remote
- ★ 1 Watch Doge Zone
- ★ 3 - 24 Hour Zone
- ★ 1 SOS Zone

CE FC RoHS COMPLIANT
